

CERTIFIED TECHNICAL ARCHITECT PROGRAM

Sovereign Bank Case Study

WEEK 1

Architect Responsibilities and Presentation Skills

Objective:

Review the main case study and become familiar with Sovereign Bank, the program team, and Suzi Matsui, the lead Certified Technical Architect at ServiceWow Consulting Services (SCS).

Present a compelling argument for how your knowledge and skills as a technical architect will allow you and your team from SCS to overcome some of the challenges on the Sovereign Bank implementation. Your group can be a team at SCS or you can simply be part of SCS, without reference to your group.

Your audience will be the key players at Sovereign Bank: Zhang Wie (Project Sponsor), Li Na (Enterprise Architect), and Albert Wan (Program Director/Platform Owner) who will each be concerned with distinct aspects of the transformation.

Discuss with your small group:

- In your own role, what are your current architect responsibilities? How do they differ from the ones listed in the training materials?
- What knowledge and skills will be most useful in the Sovereign Bank implementation?
- What key challenges will test the team and require you to develop new skills?
- What key points should be included in your presentation?
- How can you structure your presentation to be most effective?
- What will your audience be looking to get out of the presentation?

Recommendation needed:

Prepare a **10-minute** presentation:

- Introduce your group and your presentation topic
- Describe the types of challenges you anticipate Sovereign Bank may encounter during implementation and how you plan to overcome them
- Leverage at least one audiovisual component to enhance your presentation. This may include images, diagrams, animations, etc.

Note: Your presentation for week 1 does not need to be heavy with technical details. The following weeks will dive into technical content.
